

ARFF

Senate

(a) The Administrator shall conduct a study reviewing current and future airport safety needs that (1) focus specifically on the mission of rescue personnel, rescue operations response time, and extinguishing equipment and (2) gives particular consideration to the need for different requirements for airports that are related to the size of the airport and the size of the community immediately surrounding the airport. (b) The Administrator shall transmit a report containing the Administrator's findings and recommendations to the Aviation Subcommittees of the Senate Commerce Committee and the House Transportation and Infrastructure Committee within 6 months after enactment. (c) If the Administrator recommends, on the basis of the study, changes to the Code of Federal Regulations, the Administrator shall include a cost-benefit analysis of any recommended changes. (Section 451)

House

The Administrator shall initiate a rulemaking (1) focusing, but not limited to, on the mission of rescue personnel, rescue operations response time, and extinguishing equipment and (2) taking into account the need for different requirements for airports depending on their size. (Section 513)
